European music...

## Star to sing Saturday

Works by classical European and contemporary composers will be featured in the concert of the BYU Opera bass Jerome Hines when he performs Saturday at 8:30 p.m. in the Smith Auditorium.

**MR. HINES WILL** begin his program with "Largo" from "Xerxes" and "What Land Is This" from "Moses" both by Handel. He will then sing arias by Mozart — "All You Lovely Women" from "Così fan Tutte," "Within These Holy Flute," and "Madame" from "Don Giovanni."

"Song of the Muses" by Beethoven and Schubert's "Der Doppelgänger" and "Der Erlkönig" will be next, followed by "Fu Dio che disce" from "L'Elise" by Appolloni.

Following an intermission Mr. Hines, accompanied by Alexander Alexay, will play three piano solos. These will be three short preludes by Shostakovich and Chopin's "Mazurka, Opus 17, No. 4" and "Valse brillante, Opus 34, No. 1."

**RETURNING TO THE stage** Mr. Hines will perform "Laestatemi morire" by Monteverdi, "Vittoria, vittoria mio core" by Carissimi, "L'Invitation au voyage" by Henr Duparc, and "Le Tambour major" from "Le Calé" by Georges Bizet.

Finishing with a contemporary section, the bass will sing "I am a Black Pierrot," "Broth-

er Will, Brother John," "Go Down Moses," and "Loneliness" a piece of his own composition.

Mr. Hines has also written "Am the Way" which is based on the life of Christ. He has produced the work and played its leading role in Salvation Army centers and churches, principally in New York's slum neighborhoods, paying most of the expenses himself. Hines once commented, "I can only hope that this work will help and reach people. I know one thing... it has helped me more than I can ever say."

## Sociology society to organize at Y

A chapter of Alpha Kappa Delta, national Sociology Honor Society, will be organized at BYU according to Joseph N. Symons, chairman of the Department of Sociology and Anthropology.

**ALPHA KAPPA DELTA** was originated in 1920 at the University of Southern California by Dr. James E. Borden.

To be eligible for membership, a student must have at least 10 credit hours in sociology and a "B" average. Letters of invitation will be sent to qualified students, said Dr. Symons.

Dr. Clean M. Vernon will be faculty adviser for the group, according to Dr. Symons.

## Watch out guys...

## 'Sadie Hawkins' to get men

Students may lop to KOVO records in a "Sadie Hawkins" atmosphere Saturday night.

Eddie Day, a KOVO disc jockey, will spin the records between 8 and 11:30 p.m. in Cannon Center.

**THE DANCE** will feature mixers, according to Karen Knudsen, Central Dance publicity chairman.

Dress should be the type similar to that worn by character's Lil Abner cartoon, said Miss Knudsen. Admission charge is 25 cents.

**HOLD ON LEM!** — Sadie got her man — men? "Sadie Hawkins" (Sue Evans) makes sure she'll have a man for the hop Saturday at Cannon Center. It ain't no use say Steve Jesse, left, and Bill Jackson.

## 'Abilities unlimited' best describes Kehr

The "travelingest news gatherer," so called by his colleagues, will be in residence at BYU for an assembly Monday at 10 a.m. in the Smith Fieldhouse.

### TODAY'S HEADLINES and

ERNEST A. KEHR

## 3 D's ready, debut tonight

Making their professional debut tonight, the 3D's have planned an evening of song. "The 3D's in Concert" will begin at 8 p.m. in the Smith Fieldhouse. Admission for both the concert and the dance afterwards is 50 cents.

The trio, together since 1960, is composed of Duane Hiatt, Dick Davis and Denis Sorenson.

**THE 3D'S HAVE** chosen these folk songs among other for their program: "Fast Freight," "Water Boy," "Gospel Train," "Good News," "Sylvie" and "Tim Evans."

Performing at halftime intermission will be the Combs Twins, another popular group on campus. Ruth and Beth are both transfers from Eastern Oregon College.

Dancers are to be held in the Smith Family Living Center and the Smith Ballroom after the concert. Grady Edenfield will play at the Ballroom, and the Kaye Burgen Quintet will perform at the SFLC.

## World news flashes...

## Gripers disgust G.I.'s

**BERLIN** (UPI) — American GIs stationed in this Communist-encircled city have little respect for any soldiers who want to get out of the Army because they think the Berlin crisis is over.

"The crisis isn't over and anyone who says so is foolish," said Spec. 4/C Clarence Riley, 20, of New Orleans, La.

Riley himself was hit by the Pentagon order which extended military service for many Berlin Garrison soldiers.

"It was necessary," he said with a shrug. "Plenty of us would rather be home, too. It's tough sometimes on guys who've been to civilian life, but we've all got an obligation to defend our country. If President Kennedy gives in to the gripers a lot of guys around here will feel plenty sore and let down."

what they mean in terms of U.S. foreign policy and world politics will be discussed by Ernest A. Kehr of the editorial staff of the New York Herald-Tribune.

Following the philosophy that only on-the-spot investigation can provide accurate the complete understanding of headline events, Mr. Kehr travels an average of 70,000 miles each year in search of facts for his feature articles and lectures.

Educated in New York City, Mr. Kehr planned to teach philosophy after receiving his master's degree. But when the 1929 depression hit, he could not teach their faculty. He obtained a job writing hobby columns with the New York World-Telegram.

**TO START HIS** column he first had to convince the editor that the paper should have a hobby page for the benefit of unemployed readers.

On a chance assignment abroad, Mr. Kehr demonstrated exceptional reporting ability and was persuaded by his editor to switch to foreign reporting, where he could utilize his extensive knowledge of foreign lands.

**IN 1939** he joined the editorial staff of the New York Herald-Tribune. During World War II he covered Alaska and the Caribbean. In 1945 he was sent to Europe, North and West Africa.

He was with former Vice President Richard Nixon during part of his controversial South American tour. Nasser, Chamoun, Giscard, Sadiq, Pope Paul and Chancellor Adenauer are a few of the world leaders he has interviewed.

**FLUENCY IN SEVEN** languages enables him to gather local attitudes and perspectives from the man-on-the-street in any country he visits.

He has been awarded several awards in different countries for developing good relations between those nations and the United States through his coverage of the news.

He is writing for the Herald-Tribune. Mr. Kehr also contributes to Life, This Week, Reader's Digest, Think and Saturday Evening Post. He is also a well-known philatelist and has met practically every world leader who collects stamps.

## Jet recorder found

**NEW YORK** (UPI) — The flight recorder of the jet airliner which fell here March 1, killing all 95 aboard, has been recovered and taken to Washington for an examination which it is hoped will provide clues to the probable cause of the crash.

## Attache seeks asylum

**MIAMI** (UPI) — Jamon Kour Barreto, a brother-in-law of Cuban Foreign Minister Raul Roa, has applied for asylum in the United States as a political refugee, it was reported today.

Kouri recently quit his job as Cuban Commercial Attache in Bonn as a protest against the policies of Fidel Castro's government.

CAROLYN MUFICH

DOUGLAS A. CHRISTENSEN

This week we honor...

## Math, E.E. majors cited

Being honored this week from the College of Physical and Engineering Sciences are Miss Carolyn Mufich and Douglas A. Christensen.

Miss Mufich is a senior math major from Bakersfield, Calif., with a 3.5 average grade.

Miss Mufich spent two years at San Bernardino Valley College where she was secretary of Lambda Delta Sigma and member of the LDS Institute. At the "Y" she was a member of Y-Calcareous. During the summer, she worked for Cannon Research.

Her special interests include reading, sewing and knitting, and she especially enjoys attending basketball games and "Y" Day, she said.

Miss Mufich plans to continue her studies in graduate school next year and then hopes to work in industry.

Christensen, a fifth year electrical engineer from Bakersfield, Calif., has a 3.97 grade point average. He is married to the former Loraine Nielsen.

He has been secretary of Blue Key; treasurer of Phi Epsilon, a non-sorority honor fraternity; and member of Y.E.E. Electrical Engineering Society and Sigma XI, science and research honorary.

Music and research are special interests, he said.

Last summer, he did research work for the Bell Telephone Company in New York. He is working in the Research Department for Doctor Fletcher on the analysis and synthesis of musical tones.

Christensen plans on continuing his education to receive his master's and his doctor's degree.

## Senate recount action draws student critique

Tuesday's Daily Universe reported the senate passed an amendment to the ASBYU Constitution through a miscount in the voting.

If the senate operates under the accepted rules of parliamentary procedure of either Roberts or Sturgeon, we would question the validity of their action on the following points:

1. **THE ASBYU Constitution**, Article XI, Sections 1 through 4, gives the methods of amending the Constitution, none of which has been followed in this case.

2. The first vote failed to pass the bill and was so announced. The two-thirds of the total senators (not just those present or voting) was not achieved.

3. In violation of the Constitution, Article II, Section 3, Subsection 2, attendance is compulsory under penalty. Why then, on such an important issue, were senators allowed to leave prior to the vote?

4. **WE WONDER UNDER** what parliamentary procedure the recount was called for. After a vote on a motion has been taken and announced, the motion cannot be reconsidered except under special rules. Demand for recount is not one of them.

It seems that the bill was defeated in the first place, then an illegal recount was called for and the chair reversed its decision (also illegally) and announced the bill had passed.

Then following the whole extra-legal operation, the chair found its original decision in order.

**COMES THEN** the pronouncement that since it was announced as passed, the bill will stand unless the Senate takes any further action.

If this is representative of Senate action and parliamentary procedure, perhaps some revisions should be made in the structure of this organization.

Virgil N. Kovalenko

## Men's halls hold honors feast

The first Scholastic Achievement Banquet for the top scholars at Helaman and Allen Halls will be held Monday at 7:30 p.m. in Cannon Center, according to Karl Wood, assistant head of Housing and Housing.

Dean B. West Belnap will be guest speaker at the event. Student Coordinator Paul Felt will be the other special guest.

**TO QUALIFY** for the scholastic honor, men had to achieve a grade point average of 3.25 or better. Approximately 200

men who qualified for the honorees will be in attendance, along with their guests, said Mr. Wood.

A TROPHY will also be presented to residents of Stover Hall, floor 1100, the members of which achieved the highest grade average among the men's halls. Sharing in this honor are 33 occupants of that floor, according to Wood.

The banquet is sponsored by the Men's Housing Intra-Hall Council.

# Campus Comment and Controversy

## Suggest solution

Dear Al E. By.

Concerning your column written on the 6th of March we would like to suggest partly in agreement and partly in disagreement with the editor the following.

First of all we disagree with your statement that one of the purposes of class government is not for those in offices to gain experience and growth. This is definitely one of its main purposes.

**SECOND OF ALL** we agree with you that there is a great lack of unity and spirit among the classes. This is a definite problem, and we would like to suggest the following as a solution.

The creation of a Participation Chairman within the cabinet, whose responsibility would be the promotion of class unity, spirit, and participation.

He would accomplish this by the following: 1. Dividing the class up into zones according to housing.

2. A ZONE leader would then be chosen from the class within the ZONE.

3. It would then be the responsibility of the Participation Chairman to inform all zone leaders of the activities and developments within the class. The zone leader would then inform all members of his class within his zone of these activities.

4. Through this same contacting system new members,

returned missionaries, etc., could be welcomed into the class, and informed of coming activities. They would in turn identify themselves with the class and take pride in it.

Through this type of organization suggestions from the members of the class could be quickly passed to their leaders. We would also suggest greater competition between the classes in presenting assemblies and other functions. This could be promoted by having a semester and yearly award system.

David Howard  
Clair Eliaison  
Sydney Smith  
Mary Jane Duffin

here with the idea of utilizing the Church's facilities which is easily seen that there is a definite place on this campus in as many aspects as the Church deserves.

The Church formulates policies and if we are trusting, we are doing.

**THE USAGE** of the Gospel helps us see our obligations well within bounds. It was used to motivate us into honoring a little part of what the Church has done towards our school (It was ascertained that the Church pays approximately per cent of our tuition-expenses.)

People who objected to Gospel implications (blessings and what not) in reality did not want the issue to become more than they would feel if they were shaking their heads.

In the university represents big "business," so does church. The Gospel and "business" mix! The Welfare Plan, the Missionary Program, the Church Education System and the Building Program are certainly good examples of "big business" and more comprehensible than most of us realize. The moral reasons for support of these programs go much deeper than the phrase, "... donations freely given are donations freely given," would infer!

Stanley Han

## To honor Church

The editorial of February 28th and the letters that supported it seemed strangely out of context. The whole idea is easily seen to have been a critique levied at some state institution for resorting to Gospel tactics in order to alleviate money problems.

State institutions cannot make the issues moral because this very same type of objection would be made by any group.

**THIS IS NOT THE CASE** at BYU. It is a church school and therefore can moralize issues. Examples are the honor code, no smoking or drinking, etc.

Besides that, we don't come

## Meat cutters learn trade, aid packers

Scales, cutting blocks, butchering knives, an electric cutter and a blackboard for illustrations—these are the tools of the student meat cutters who work in the Animal Husbandry Dept.'s meat cutting laboratory on North Canyon Road.

**THEIR WORK** area includes a slaughter room, a drip room, an aging room and a cutting and processing room—most of one building. Here they test samples of beef, pork and lamb, according to Dr. Phil Shumway, associate professor of animal husbandry.

Meat samples from many packing companies are sent to BYU's laboratory to be tested for quality. In lamb and pork, a large "eye" of lean meat in the center of the cut is an indication of good quality.

**BY BREEDING** and butchering selected offspring of good-quality sample animals, meat packers develop a better grade of meat products.

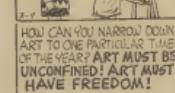

Two Freshmen students were enrolled in the meat cutting class when the lab was first opened for this purpose in the fall of 1961. The lab, directed by Dr. Keith H. Hoopes, is also used to supplement other classes in the Animal Husbandry Dept.

**CHOICE CUTS**—Dr. Phil Shumway, left, supervises Frank Davis and Lloyd Davies as they practice butchering techniques in the new meat cutting lab. Bryce Pitt

**WHY THIS MONTH?** WHY NOT LAST MONTH? WHY NOT NEXT MONTH? WHY THIS MONTH?

HOW CAN YOU NARROW DOWN ART TO ONE PARTICULAR TIME OF THE YEAR? ART MUST BE UNCONFINED! ART MUST HAVE FREEDOM!

**SATURDAY SKI RACES**—Race officials are holding previous Sportsman Cup trophies and BYU Winter Carnival Broken Ski won by sponsoring Sportsman's Club members. Officials are, from left, Rich Rampton, Howard Uibel, faculty adviser, Dave Hendrickson, president.

## owers lived up to instructions in surrender, earing corrects erroneous impressions

William Theil  
Met Press International

**WASHINGTON**—U-2 pilot James E. Powers got a bill of health from the Central Intelligence Agency and appeared before the Senate Armed Services Committee to tell his story of being downed over Russia.

In a summary statement made public through the House Armed Services Committee, the CIA said Powers had been instructed to "surrender without resistance and adopt a cooperative attitude" if escape as impossible.

It said Powers was not ex-  
pected automatically to take his plane when downed or

The CIA said Powers lived up to his instructions and his "obligations as an American" when plane was downed and during the events which followed. In an opening statement, Chairman Richard B. Russell said, "The hearing was convened to correct the erroneous impressions" and to give Powers a chance to tell as much of his story as he could consistent with security requirements.

Russell said it was apparent that he had been "in the natural interest and in the interest of fair play for Mr. Powers." The CIA report said the pilot's needle with which Powers was equipped and which figured prominently in his Moscow trial was supplied only in case he might be subjected to torture or other conditions which made suicide seem the only way out.

The CIA report also gave the details of what happened when Powers' U-2 was downed over Central Russia May 1, 1960. An official account stated that by the time Powers freed himself from the cockpit and was ready to leave now-wingless, tumbling U-2, had been tossed by whirling forces into a position where he could not reach the "dead" switches.

The overall conclusion of the questioning was that "Mr. Powers lived up to the terms of employment and instructions in connection with his mission and in his obligations as an American under the circumstances in which he found himself."

The CIA report also cleared speculation that the plane had been sabotaged. The report said there was no evidence to support this claim. It emphasized that U-2 pilots had been selected only for their ability as fliers, and "the whole purpose of the mission was far removed from the traditional espionage scene."

The only job of the pilots was to fly their planes, the report

## Sportmen offer 18 trophies in race

Attention all beginning skiers  
and holders of classified race cards.

**SATURDAY** morning at the Timpanogos Skiing area the annual Sportsmen's Cup Race will be held. Student skiers are invited to try for one of 18 trophies which will be presented to those who place first in each class, said Jim Bennett, Sportsmen member.

Registration will be between 11 a.m. and noon Saturday and the race will begin at 12:30 p.m., according to Bennett.

Classification of races are:

Men's Class A, those holding classified race cards or those who feel adequate for this competition.

Men's Class B—parallel skiers.

Men's Class C, all others including snow plow.

Women's Class B—parallel and stem christe.

Women's Class C, all others including snow plow.

After the class competition there will be a special single

ski race which will be open to all skiers, related Bennett.

"THE MEASURES TAKEN"—Members of the Experimental Theater practice for the Communist propaganda play, "The Measures Taken." The play will be presented

'The Measures Taken'...

## Russian drama to play

A Communist propaganda play, "The Measures Taken," will be presented March 16 as the first in a series of BYU's experimental Theater productions.

It will be presented in College Hall at 7 p.m. Mask Club members will be admitted with their cards; others will be charged 25 cents.

**DESCRIBED AS** "the only great drama of the new era of communism of Soviet Communism," the play is concerned with the report of four Communist agitators who have returned to Moscow from China, where they were commissioned to spread propaganda for the party.

Under the judgment of the "Party Conscience," the agitators explain how they were forced to annihilate the fifth comrade because he endangered

the success of the movement.

The play was written by Bertolt Brecht, and when first produced in Berlin in 1928, it was much criticized from both anti- and pro-Communist presses.

While the author, an admitted Communist, was living in the United States, this play initiated an investigation of him by the Un-American Activities Committee.

**CAROL LYNN WRIGHT** of Provo, a graduate student in Dramatic Arts, is directing the play. Lee Clifford of Burley, Idaho, also a graduate student in Dramatic Arts, is designer and technical director.

The four agitators will be played by Don Wright of Provo; Jim Pinney of Whitefish, Mont.; Karen Keeslar of Springfield, Ill.; and Steve Southwick of North Ridge, Calif.

sented Monday night. Players are from left: Don Wright, Karen Keeslar, Steve Southwick. Jim Pinney looks on.

## Peter Pan set for Saturday

Never, Never Land, with its cunning pirates, its wild Indians and its beautiful mermaids, is the setting for the play "Peter Pan."

The play by Sir James N. Barrie, sponsored by the Provo PTA Council, will be presented at the Provo High School Auditorium Saturday at 10 a.m., 2 and 7 p.m.

**THE PLAY** features a cast of 27 BYU students, with Buddy Youngren as producer-director.

Original songs will be sung to music composed by William Sharp and his orchestra. Sets for the production were contributed by the University of Utah.

Tickets are 25 cents for children, 50 cents for high school students and 75 cents for adults. They may be purchased at the door.

## Faculty group views new grading system

A faculty committee is considering a change in grading system at BYU. The change would include add plus and minus values to the existing letter grades.

The exact numerical value of the plus and minus compared with the A to E gradations will be decided at Thursday faculty meeting, said Dr. Richard Hales, chairman of a special committee on the University grading system.

**THE FACULTY** will vote on suggestions presented to the committee and if passed, the grade change will be presented to the Administrative Council for official acceptance or rejection.

In the February faculty meeting a vote favored the some change be made in the present grading system.

If accepted the grade change will probably be effect starting fall semester, 1962, Dr. Hales said.

## 2,106 former missionaries at Y...

## Return after missions

A total of 2,106 returned LDS missionaries are registered at BYU, President Ernest L. Wilkinson has announced.

Of this number, 204 had previously attended BYU and are now returning to complete their work.

"THE PRESENCE of such a large group of mature men and women can be definitely felt in the scholarship and dignity and the culture of our student body," President Wilkinson said. "The language and the manner of the returned missionaries from missions all over the world is a great asset to the cultural level of the campus."

They are from the Andes Mission 7, Alaska-Canadian 13, Argentina 48, Australia 14, Austria 3, Belarus 1, Brazil 18, Brazil 1, Brazilian South 6, British 15, California 67, Canadian 64, Central American 33, Central Atlantic 57, Central German 4, Central States 57, Czechoslovakian 1, Danish 36, East Central States 61.

**THE UPSWEEP** wearer combs the hair forward from the back of the head with a wave combed down over the ears.

With the coming of Spring, combs will begin to sigh at some of the more daring college men who will appear all shiny and glossy in their new Yul Brynner haircuts.

## AWS encourages more candidates

More girls than ever will be able to participate in AWS elections this year, reports Doris Allred, AWS executive director. The reason—the AWS Constitution has been amended by the current officers and councils so girls other than those having direct contact with AWS will be eligible to run.

**THE NEW** stipulation for president include having a 2.5 grade point average, being either a junior or a senior while in office, and being one or more of the following: underclassman, chapter member, one of the AWS councils, class officer, officer of service, honorary, or departmental unit, or chairman of an event such as Homecoming or Junior Prom.

Candidates for Vice President of Housing must have a 2.5 grade point average and can serve as either a member of inter-dorm, inter-house or city councils or as a senior resident.

The only requirement for Vice President of Activities and Secretary-Treasurer is a 2.5 grade point average.

**GIRLS INTERESTED** in running for an AWS office should contact Miss Allred at FB 4-1770 and the Elections Committee. A special AWS orientation session for candidates is scheduled for March 26 at 4:30 p.m. in 205 ESC.

On March 19, candidates will meet with Elections Committee. March 26, they will have a test on the Constitution, which they may pick up in the Elections Office between 2 and 3 p.m. daily.

Primary voting is slated for April 5 and 6. Final voting will take place April 12 and 13 with the results announced at Song Fest April 13. Miss Allred urges all qualified girls to consider running for office.

**BESIDES THE** changes in qualifications, the AWS officers and councils made a few other minor changes in the AWS Constitution Monday night at their joint monthly meeting. Changes were made to more clearly differentiate the three AWS Councils—the Senior Activities Council, the Junior Activities Council and Housing Board.

The Vice President of Activities is given authority to preside at the Senior Activities Council's meetings.

## 'Tempo for Tomorrow' themes annual BYU Songfest show

by Carrie Corleas

University Society Writer

Songfest practices are already underway, reports Chairman Lola Webb. With the theme "Tempo for Tomorrow," the projection of today into tomorrow, Miss Webb expects an exceptional year.

**MISS WEBB** reminds all participating units to schedule their practices so as to sign up sheet posted on the bulletin board of the AWS office.

She also emphasizes the time limit this year (three minutes with a leeway of thirty seconds). Songs that exceed this limit will be disqualified at semi-final and final.

Another deadline comes March 12 when all completed drafts of the song to be used must be turned in to Miss Webb. She is requiring 10 mimeographed copies in order to serve the purpose of the judges and final review.

These copies will be sent to the judges in order for them to be familiar with the songs presented so they can judge fairly. An organization isn't of

## Coeds seek 'Mrs.' degree

**NEW YORK**, (UPI) — An "M.A." is the first degree most women seek.

After that come varying editions of the "MA"—for mother-degree.

Now more and more females who have the two basic degrees are seeking the formal bachelors' degree in college nationwide. These more students are called college mothers.

Why do the go back to school? And what do they hope to do with their degrees once they earn them?

**THE QUESTIONS** are answered by collegiate mothers themselves in a report by a collegiate mother, Mrs. Marian Carter Lewis, in the maiden edition of "University Woman," a new quarterly published by Farleigh Dickinson University in Madison, N.J.

Answers are as individual as the women themselves, but they are all variations on the same . . . theme—women's place in this modern world," Mrs. Lewis reports.

Mostly, the mothers going back to school recognize that females are in a state of transition.

**EARLY MARRIAGE** and child bearing with more outside activities for young children, coupled with labor saving devices, greater leisure and prolonging life expectancy have given women a new kind of freedom," Mrs. Lewis said.

The average woman is slightly past 30 when her last child starts school and she lives to be 70. What does she do for the next 20 years? ... Even if a woman's home is not enough if it is an empty home most of the day.

As Mrs. Lewis views the situation, modern woman's greatest challenge is to fill the spiritual vacuum left by the constant contact with gadgets and the time created by them.

## Cookie's Corner . . .

# Breakfast spices day

by Lynn "Cookie" Varner

University Society Writer

Did you know you don't lose weight by going without breakfast? ... Studies have conducted a study and found that students who had eaten breakfast were: one—calmer and steadier; two—sharper and more alert; three—worked better; and four—students in the study did not complain when they went without breakfast.

**NO MATTER** what size or shape you are there is a break-

fast just for you. There are breakfasts that are light for the petite miss and hearty ones for the athletes.

Breakfast is an important part of our daily diet. It is essential in order to perform our best that we start out the day right—with breakfast. It is recommended by leading nutritional authorities that the breakfast meal should provide from one-fourth to one-third of the day's total food requirement.

**MOST FOLKS** like a change now and again in their breakfast meal. There are many ways to put variety and maybe surprises into breakfast.

Try adding fresh berries with sliced peaches for example or sliced bananas with oranges for a change in flavors and when you don't have enough to go around. Scramble eggs with chopped onions for a different flavor.

Usually a breakfast consists of a citrus fruit or juice, oats or cereal, bread or baked product and a beverage. How does your breakfast score by this score sheet?

FOOD	SCORE
Citrus fruit or juice	2
Other fruit or juice	1
Milk to drink	2
Cereals	1
Egg or other protein food	1
Cereal with milk	1
Bread or baked product	1

Score: 12 very poor  
23 poor  
45 good  
5 very good

1962 post mortem ...

## Cougar attendance up as hoopsters go down

It took a little searching through the season statistics, but BYU's basketball team finally came up with something to shout about—home game attendance for 1961-62 reached a four-year high.

WHILE attendance figures were up, the other cage statistics were definitely down. The Cougars' trailed opponents in percentage of field goals scored, free throws made, rebounds and overall scoring. They led opponents in only two departments, most personal fouls and disqualifications.

Obviously, the 1961-62 season was a disappointing one for all concerned, especially for Coach Stan Watts. The 10-16 record was only the second losing campaign in BYU's 13 seasons as head coach of the Cougars.

INDIVIDUALLY, if the figures were to be believed, the Cougars left much to be desired. Only one regular center, Bruce Burton, hit over 40 per cent from the field.

Burton, who led the team in rebounds (271) in 23 games, sank 42 per cent of his field goals and averaged 14.0 points a game. He came within one point of edging Bob Skousen as the team's leading scorer. (Skousen had 363 compared to Burton's 362.)

THE CATS' 3-23 record took 230 more shots from the field than did their opponents but as a team they were only 38 per cent effective, while opponents were hitting 43 per cent. This poor

shooting percentage undoubtedly cost the Cats several victories in their final season in the Skyline.

Bob Skousen's 47 points in the second game with UCLA set a new school and conference record. But this, too, was short-lived. Utah's Bill McGill wrote several new offensive marks in the fieldhouse with 60 points tallied in the Ute's 106-101 win over BYU.

ONLY OTHER figure of note by an individual player was the fine free throw shooting of Gary Ziegler. The junior sank 118 of 198 or 59.8 per cent, a fat 93 per cent from the free throw line.

Although only two seniors will be graduating from this year's squad, Coach Watts was asked if he intended his team to get it functioning properly again. Guards Bob Wilson and Gene Kunz are both seniors and will not be returning next year.

THE TEAM'S top five scorers, plus half a dozen reserves, will be back in 1962-63. Meeting the group will be Burton, forwards Bob Skousen (15.9 average) and Jim Kelson (9.7), and guards Ron Steinke (9.7) and Gary Batchelor (8.3).

After getting off to a rolling start with two wins over UCLA, the Cougars showed almost no walk. They finally lost to New Mexico, the first time in 23 starts, but managed to finish in a tie for fourth place in the Skyline standings.

urday on Tim Haven's Poma lift  
hill starting at 1 p.m. Races are  
open to all amateurs.

## Finals Saturday...

# Gunnison, S. Rich, Piute, A.F. remain in running for B honors

**Doug Christensen**  
University Sports Writer

Only four teams remain in the  
running for the Utah state class  
B basketball championship.

**AMERICAN FORK**, South  
Rich, Piute and Gunnison will  
battle it out in the semi-finals today  
in the BYU fieldhouse.

The Cavemen from American  
Fork were hard pressed by Mil-  
ford butinspired of a 10-point  
margin in the final game to top  
40 to advance against South  
Rich in the championship bracket.  
Forward Merlin Driggs led  
American Fork with 18 points  
but had to share scoring honors  
with Gary Bartholomew of Milford.

**THE SOUTH** Rich Trojans  
coached by former BYU Cougar  
star Gary Earnest topped North  
Sanpete 48-43. Reed Groll netted

20 counters for the Trojans

who represent one of the smallest  
schools in the tournament with an enrollment of 80 students.

Center Layne Dalton of Piute  
moved into first place in the  
individual scoring race as he  
scored 23 points against Green  
River giving him a total of 57  
points in the two games. Piute  
topped the Pirates 58-52 as they  
took an early lead and never  
were pressed.

**WITH THE** finals slated for  
Saturday evening only two of  
the best teams will have a  
chance for state honors and  
Gunnison looked as if they were

determined to go all the way.  
They defeated Milford 56-40.

Gary Hill of the Bulldogs and  
last year's scoring champion netted  
26 points giving him a total of 47 in tournament play.  
Guard Eugene Bartholomew was a  
big factor in Gunnison's win  
as he hit consistently from outside  
the arc in the early stages of the  
game. He notched 15 points for  
the Bulldogs.

In the consolation bracket **B**  
Y High eliminated Delta from  
further tournament action with a  
narrow 55-52 victory over the  
Rabbits. Forward Dick Thomas  
hit for 29 points for the BY  
High. Wilford was pick up high  
scoring honors for the Rabbits.

**THE WILDCATS** won the  
game in the final seconds of play  
breaking a 52-52 tie on a field  
goal and two free throws. Dean  
Perkins was top man on the  
floor for Delta with 26 points.

Morgan High downed South  
Sevier 55-52 in another squeak-  
er. Scott Nelson and Dave Cas-  
ter scored 14 points apiece for  
Morgan. The victorious Trojans  
met Cedar City in the third

round of tourney play.

**THE REDMEN** from Cedar  
City scored the most points to date  
in a single contest in the current round ball classic as they  
handled Moab an 85-47  
thumping. Guard Don Roberts  
went on a scoring spree in the  
first half and hooped 24 points.  
He went high scored for the game  
with 28 points.

Neil Roberts scored 18 to back  
up his namesake. For the Devils,  
Merlin Olsen a 6-4 center  
scored 21 markers.

**GRANTSVILLE** grabbed an  
early lead and went on to defeat  
Dixie 52-45. Wayne Boyer was  
top scoring for the Devils with 17  
points. Gary Hill of the Cowboys  
with 17 points. He shared top  
scoring honors with Dixie's  
Richard Blake who also notched  
17.

In today's B tourney, Uintah  
met Green River at noon. At  
4 p.m. Grantsville plays BY  
High in the consolation bracket  
followed by Piute and Gunnison  
at 2:40 p.m. in the champion-  
ship flight.

Milford plays North Sanpete  
at 5 p.m. and Morgan battles  
with Cedar City at 6:20 p.m.  
American Fork and South Rich  
top off the day at 7:30 p.m. with  
play in the championship bracket.

In five years...

# You name it, this guy collects it

by Pam Stott  
University Feature Writer

A redheaded with a yen for collecting is freshman Bill Barbosa who has collected at least \$3000 worth of items since five or six years ago when he began.

The most important one of all his collections, and most interesting to the LDS, is that part of his rare books collection which contains three of the original books in the Deseret Alphabet. Right now Bill and Chad Flake, head of the rare books

department of the library, are looking for the fourth, a copy of the Book of Mormon.

**THE OTHER** three are the First and Second Reader, and Excerpts from the Book of Mormon.

Also included in the book collection is a Hitler scrapbook written completely by hand in German. It contains various depiction of the rise of the German Führer. This Bill bought from a friend who bought it in Germany.

Several Oriental swords, some

ancient bayonets and daggers and about \$2,000 worth of rifles and pistols are included in his arms collection.

**ONE OF THE** strangest collections he has is an egg collection. He bought it from a fellow who got it in Germany just as it is now. The eggs were when the contents blown out for the purpose of preservation.

"Three of them are fossilized and are approximately two thousand years old," Bill said.

**ONE DAY** a couple of months ago Bill was rockhounding diving in Clear Lake, Calif. He cut his leg on something sharp that protruded from the bank. He returned to see what had done the damage and discovered an Indian spear point.

**THESE** are just a few of his collections of Indian artifacts, most of which he has found in California.

Bill said that "a few of the more talented Indians" made arrowheads out of whiskey bottle glass.

**AS FAR AS** rockhounding is concerned, Bill does his share. He has some fossils from Idaho, some Succor Creek, Idaho nodules, and some thundereggs from Oregon.

Actually, thundereggs and nodules are the same thing, Bill says. They are ordinary looking round stones that, when cut, reveal colorful strange designs on the inside. They are often cut and shaped into smaller pieces and made into jewelry.

**ALSO, BILL HAS** a few pearls and several pounds of jade, a semi-precious stone. He had to dip into his nodules to get that, though. He traded some of his prized Succor Creek nodules to "a guy from Wyoming" for seven or eight pounds of jade.

Bill has a coin collection, too—something no collector would be without. Included in that are variety of very old American coins, some gold pieces, some coins from the Orient, a coffee can full of other foreign pieces. The American coins make up most of the collection, however.

**WHERE DOES HE** find all these things? He looks for them frequently in pawn shops, antique shops and old book stores, trades for or buys them and has his whole family on the lookout for things he might want or places he can get new things to add to that which he already has.

His next collection is Bill's next objective, but he has met with opposition. His mother has forbidden it. She did agree to his collecting any and all kinds of antiques, though, just as long as they were for her.

At the moment Bill hopes to go into counseling when he graduates. He is from Nampa, Idaho, which is a good jumping off point for rock and fossil collecting, he says.

## Two Y chemistry professors engaged in study of atoms

What happens when the "glue" holding the basic components of life is stripped away?

And how much heat energy does this bond of hydrogen atoms in bridging these components of nucleic acid?

These questions face two BYU chemistry professors as they conduct research supported by a recent \$54,654 grant awarded by the Department of Health, Education and Welfare.

**DR. JAMES C. CHRISTENSEN** and **DR. R. J. IZATT** will conduct the three-year study on the thermodynamics of nucleic acid.

The discovery and analysis of nucleic acid are some of the most exciting developments of the century in the fields of biology and chemistry. Along with simple proteins, nucleic acid is one of the few substances studied by scientists who are trying to create life in a test tube.

Genes, which are those parts of a chromosome which determine whether a cell will develop into a liver or a kidney, are, in fact, composed of nucleic acid. Also viruses are nothing more than nucleic acid covered with a shell of protein.

**IF ONE** were to look inside nucleic acid, he would see a spiral of elements held together by hydrogen bonds. In order for the hydrogen to "glue" the component units together, it must interact with them, forming a bond. When the hydrogen interacts, heat is released. And it is this heat which is the subject of the research being done by the BYU scientists.

One way Dr. Christensen and Dr. Izatt may conduct their study is to strip the hydrogen atoms from the nucleic acid and measure the heat released when the nucleic acid is heated.

The nucleic acid to be used in the experiments has been available in purified form since only 1956. Prices range from \$200 to \$500 an ounce. Dr. Christensen and Dr. Izatt plan to use one-tenth of an ounce, or less.

They are quick to point out that their research is what is termed "basic." It will be up to

other researchers to apply the BYU professors' learnings to the thermodynamics of nucleic acid to the broader study of nucleic acids and, perhaps, itself.

**DR. IZATT** is no newcomer in scientific research. At a Institute in Pittsburgh he conducted a study on physical properties of airborne particulate matter. And for four years has directed student research on coordination chemistry in coordination chemistry.

Dr. Christensen has performed research in the polymer division of DuPont Company. And for two years he has directed student research and construction and operation of chromatographic equipment.
